

**2019 Legislative Ag Chairs Summit
Site Visits- Tuesday, July 16, 2019**

All tours will leave from the Hyatt between noon and 1:00 pm and return to the hotel around 6:00 pm. Dinner is not included. Participation in each tour is limited, with requests honored in the order in which they are received.

Since everyone has already registered, all we need now is your tour choice if you wish to attend one. Since every tour is limited, we want to work with you to be sure you get one you will enjoy.

Once you have reviewed the three site visit options – please email Carolyn at corr@sarl.us or call her at 859-265-0658

- 1) Name of attendee (s)**
- 2) First tour choice (1,2 or 3)**
- 3) Second tour choice (1,2 or 3)**

The Locations

Deepwater Farms

Growing food within the city limits of Calgary, Deepwater Farms grows 450 kg of fresh leafy greens a week and harvest 900 kg of sea bass in a closed-loop vertical farm. Their 6000 sq ft warehouse is in an industrial park at 3630 50th Ave SE, Calgary, AB. <http://www.deepwaterfarms.com/>

Wine Glass Ranch

A 5th generation beef ranch in the Rocky Mountain foothills west of Calgary. Using horses and native grasses they are diversifying into ranch to table sales to meet the growing urban demand. <https://www.wineglassranchinc.com/>

Fallentimber Meadery

Producing mead, honey and beeswax in a state of the art facility, perhaps the best part of this site visit is the 90-minute drive along the historic Cowboy Trail. It runs between the Rocky Mountains and the Canadian Prairie, in the high ranching country of Alberta. If you are not going to have a chance to vacation while you are in Alberta, this site visit lets you see some of the beauty of the Province. <http://www.fallentimbermeadery.ca/>

Canadian Greenfield Technologies Corp

With hemp being legalized in the latest farm bill, the issue now is what do we do with it? In business since 1987. Canadian Greenfield Technologies specialize in hemp decortication, processing technologies, and product development. Their advanced hemp decortication technology is the only complete hemp production platform in the world capable of decorticating and processing baled hemp into high value products. In recognition of the high interest in hemp production in the U.S. this site is included in every tour. <https://canadiangreenfield.com/>

Glenbow Ranch Provincial Park

This 3200 acre ranch was donated to the Government of Calgary in 2006. The family also donated \$6 million to establish a foundation to maintain the ranch. It is now used as an educational ranch with John Copithorne and 3J Farms managing a commercial cow herd on native pasture. <https://www.albertaparks.ca/parks/kananaskis/glenbow-ranch-pp/information-facilities/history/>
