

Community Resilience Building WORKSHOP GUIDE

The need for **municipalities, corporations, organizations, and government agencies** to build community resilience and adapt to extreme weather and climate is now strikingly evident. Ongoing events continuously reinforce this urgency and **compel leading communities to proactively plan and act**. In response to this ever increasing need and urgency, the **Community Resilience Building Workshop** was created.

The Community Resilience Building Workshop is a unique, “anywhere at any scale”, community-driven process, rich with information, experience, and dialogue, where participants identify top hazards, current challenges, strengths, and priority actions to equitably improve community resilience to all natural and climate-related hazards today, and in the future. After a decade in development, the CRB Workshop has been tried, tested and is now **trusted by over thirty five communities**.

The CRB Workshop Guidebook provides **clear instructions on how to lead your community towards resilience**. The Guidebook carefully illustrates the essentials of the process as well as the “before” and “after” workshop steps to help **ensure immediate goals, outcomes, and strategic direction are realized** within your community.

If you and your team are in need of further guidance and coaching with Community Resilience Building Workshops, **we can help! All you have to do** is visit the website below.
